## Facials

These facials are customised at every step by your skin therapist, based on your skin mapping analysis. This will be unique to each individual because of the use of our professional customisation products, including serums, complexes and botanical mixers throughout the step by step process to provide additional benefits to your skin.

Microdermabrasion is a deep exfoliating treatment using vacuum and crystal technology. The crystals are delivered at high speed to the surface of the skin and immediately vacuumed away. This technology removes the top layer of dead skin cells, revealing new, living cells restoring a healthy, refreshed glow. Its deep exfoliating effect can also help reduce pigmentation patches, stretch marks and scarring.
