

# A DAY IN CASUALTY

<b>Age group:</b>	Year 7-13, tailored to meet your curriculum needs
<b>Duration:</b>	3 hours (1/2 day) or 6 hours (full day)
<b>Good for:</b>	STEM, maths, experience of work, technology, PSE
<b>Price:</b>	Maximum 16 learners per session - 3 hours £175 per session, 6 hours £300 per session

## Emergency! Emergency! Are you ready?

### 3 hours

Are you ready to save a life? Our six-bed A&E and full size ambulance will allow learners to fully experience an emergency situation. This short session will deliver basic first aid skills and wound dressings within a hospital accident and emergency setting. Throughout the session, the discussion of treatment and care of injuries will be related to professions in health care.

### 6 hours

This isn't for the faint hearted, as learners will be fully immersed in a simulated accident with multiple casualties. They will take on the role and responsibility for attending to basic first aid needs, wound dressing and completing emergency assessments. Learners will follow casualties from incident to A&E and home. Our unique facilities allow learners to gain insight into a range of career opportunities available within the emergency services, including Police, Ambulance and accident and emergency care.

### Stretch, challenge and differentiation

For older learners we can address how to care for the dead and dying and more advanced conditions such as amputations and severe burns.

With advanced notice we are also able to involve wound simulation and realistic incidences, which will add realism to first aid and major incidences making this a truly 'truly life experience'.

Please do not hesitate to discuss specific needs of your curriculum, as our fully equipped hospital environment can be tailored to add real-life experiences to enhance the student experience.
